swahili for
"carpenter"

Construction and Engineering Limited

carpenter, all round builder'.... in the East African region.

spreading the dots

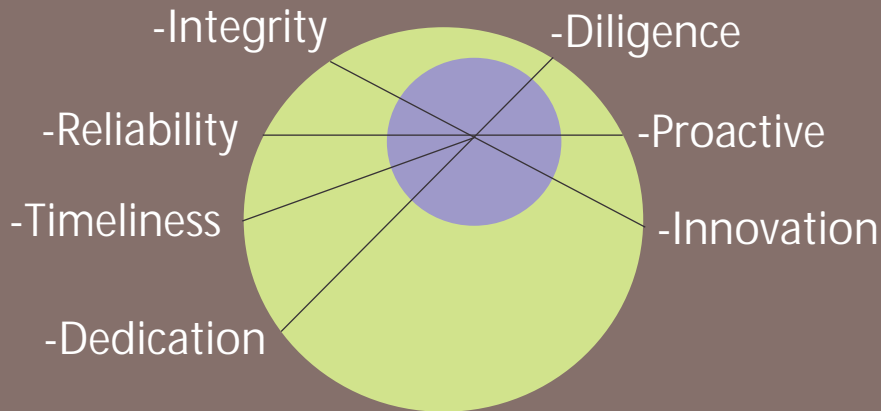

about us

Seremala Construction was started seven years ago in Nairobi Kenya, to offer unique customized construction solutions.

Right from the beginning we have been on a growth curve that has enabled us to periodically embrace industry needs creatively and with resolute focus. We deliver solutions cognizant of the ever challenging African cultural tapestry. This is done with a mindset of the broader picture which feeds our philosophy of being a spire of achievable standards in the industry.

The Seremala brand stands for

values

Every detailed part of our vision demonstrates these values at structure level and is embodied by all persons at Seremala, and those we envision to work with. We believe before we lay any block on the ground, the blocks of value listed above should be the foundation of every of our provided solutions.

from small towards great

Seremala has grown both as an entity and with its clientele - from a rack space in the middle of Nairobi, town to larger premises on the outskirts of the city (Embakasi). Growth has meant exposure and challenge. We have managed to wade through, the sometimes murky and competitive waters, of the construction industry in Kenya, and carved out legitimate space, by providing innovative solutions.

Specialty and Clientele

Seremala offers a range of services from construction of residential houses, commercial buildings, internal fit outs, renovations and emergency works. We have worked with individuals and leverage clientele such as schools, Aga Khan Educational Services, Canadian High Commission, Equity Bank. Our work is not only local but stretches beyond into the East African Region.

Flexing the Region & Managing

We have decidedly embedded our foot print in various areas in the region in spite of logistical and technical challenges posed in these countries. We have completed projects in Yambio and Kajo Keji and have current ongoing projects in Torit and Hai Malakal in South Sudan. We also have projects in the emerging Rwanda market; specifically in Gitarama and Nyabugogo. Uganda, has taken somewhat a fairer share of our work in East Africa starting from Kampala, Jinja, Adjumani, and Tororo. We have flexed the region and delivered; we have been challenged and

have grown. Most of these projects have been entrusted to us courtesy of Equity Bank. Seremala can boldly declare that it has the capacity to handle projects both locally and in the larger African region.

working with Seremala

We intend and look forward to work with prospective associations, with broad and defined contemporary view. Seremala reflects a unique all encompassing view of the industry, upholding standards, tuned to modern technology and trends. We envision journeying with clients' representative of creative, innovative and of both qualitative and broad vision. We like to say at Seremala we think and build – Block by Block.

CSR lifting one another

Seremala recognizes that every body in some way or another needs a helping hand along the way. We have benefitted from selfless partnerships in our journey. We also have been privileged to extend the same kindness to others.

Mother Teresa

"If you can't feed a hundred people, then feed just one."
